CMOLO®

World's TOP

5

in Turnstile Industry

Different Because of Concentration

2003

Initially, as a global top brands' OEM factory behind the scene, we just silently watched our products installed one by one around the world.

2004
~
2010

Over the years, as we've been concentrating all our energies and resources on the development of high-end passageway turnstiles as well as the fulfillment of related solutions, we've successfully established our own brand, and earned great reputation from the customers.

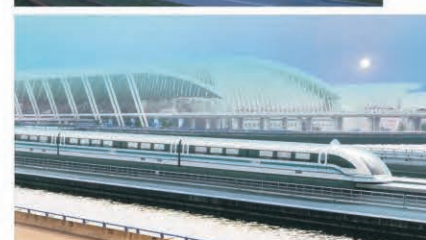

2011

CMOLO masters and owns all core technology patents from appearance, sheet metal, mechanism transmission to electromechanical control and logical algorithm etc., thoroughly breaking the monopoly of European brands on these fields.

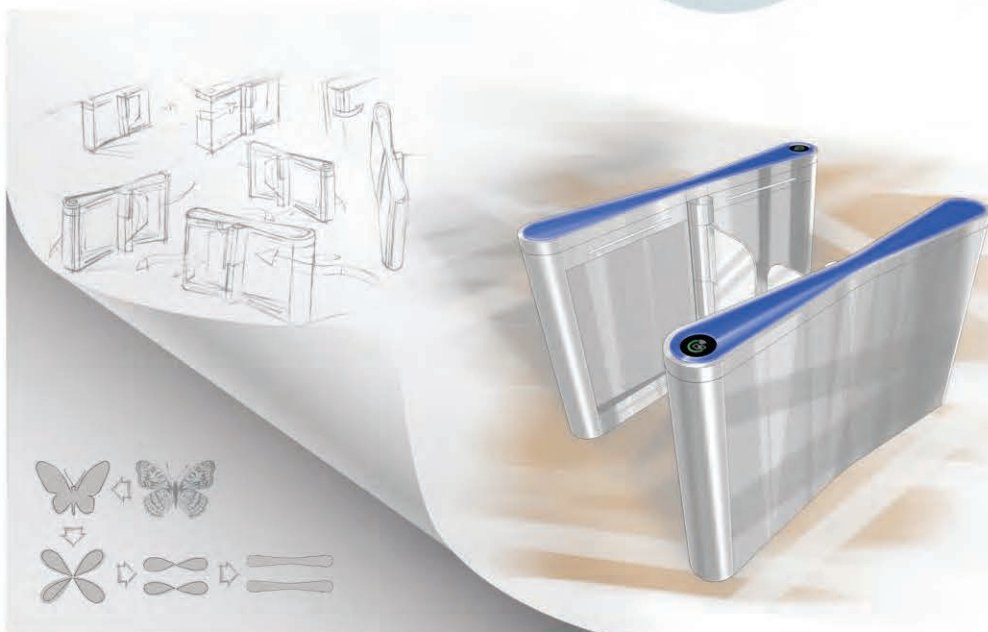

2012

Promoting the "expert-level" brand of turnstiles around the world so as to realize real internationalization -- this is every CMOLO staff's pursuit.

2013

CMOLO invests lots of resources and energies on R & D, which has well illustrated the differences between "creation" and "manufacture". This is our core competitiveness.

2014

The whole turnstile industry has been filled with deceptive and low-end manufacturing, and the disorder without criterion has led to users' worry and dissatisfaction.

Re-planning turnstile industry's new standard has become a higher mission of CMOLO.

Technologies and honors prove our strong strength

- Pass the most authoritative ISO 9001:2008 quality management system certification
- Own a number of core technology patents with independent research and development
- China's Security Industry Association Member
- Own a number of national certified software copyright
- Awarded Top Ten Security Enterprise in 2011
- Global SGS Audit Supplier
- CE Safety Certificate of EU
- National high-tech Enterprise

User's deep satisfaction drives CMOLO staff to move forward and explore attentively.

As an international brand focusing on one kind of product, CMOLO creates the new standard of global turnstile market subdivision.

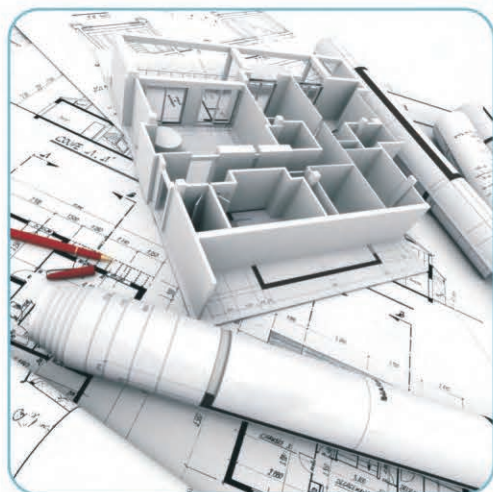

--- 2014

Our Pre-sales

Our Mid-sales

Our After-sales

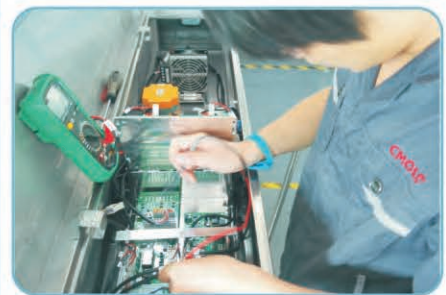

- ① Project requirements understanding
- ② Site survey and measurement conducted by system engineers
- ③ Summarization of the project actual situation, and the set up of special analysis group
- ④ Provision of professional solutions (including functions, costs, design plans, 3D site simulation, module customizations and cabling specifications)
- ⑤ Professional communication and verification for the reasonability and satisfaction of the solution

- ① Factory: integrate, install and test other supporting systems appointed by customers
- ② Construction site: preplan and installation guide; adjust & test; train and coordinate the technical acceptance of the whole item
- ③ On-site: assist to coordinate other linkage system of the whole item

- ① 1-year warranty for the whole machine
- ② Regular maintenance and repair for the machine
- ③ 5*24 hours remote maintenance service
- ④ On-site emergency repair response within 24 hours
- ⑤ Spare parts maintenance and purchase services
- ⑥ Upgrade and change product according to customer's requirements

Commercial Turnstile

Numerous outstanding presences prove our strength and difference.

Industrial Turnstile

We're formulating the highest standards in the industry; meanwhile, we're also creating the uniqueness in the industry.

IPW-AB1000

- The world' s first original A/B industrial gate, thoroughly realize unattended operation and prevent tail-gating.
- Unique patented algorithm (pedestrian/cyclist shared passageway)
- All-weather and multi-condition application, significantly lower the cost of property management.

IPW-PM1000

- The world' s first original outdoor industrial swing gate turnstile has filled the gap in the industry.
- International patented technologies: unique lossless mechanism, intelligent DC conversion, etc
- All-weather and multi-condition application, withstand frequent violent collision.

Rail Transit

The super large people flow of rail transit puts forward demanding requirements on stability, safety and advancement of turnstiles. Solving these problems needs to apply turnstile technology to the limit. Today, owing to the concentration of CMOLO team, the monopoly of European & American brands has been broken. CMOLO has officially entered the world' s rail transit field.

Aesthetic Turnstile

Convey the emotion of architectural designs;
create the precedent for passageway arts.

Technology, life, nature
--- Endless succession, all because of the wisdom of life.

The light of Rome,
a masterpiece of
classics & elegance
